

Phil<sup>a</sup> June 14 1884

Hon A Loudon Snowden

Superintendent

Sir

In answer to the request of the  
Melter & Refiner to you.

To have the water in the Pump  
room changed from pumping  
into the Culvert. To <sup>the</sup> setting

well in the Yard, It would  
necessitate an additional Pump as  
our pumps are overtaxed at the  
present time to do the work of the  
General Department. I would  
recommend to you the procuring  
of an Ericsson's Colorie pump  
for the same. all of which I  
submit for your consideration

I remain Respect Yours

John L M Ginnis

Chief Engineer

Phila.

Hon. A. Loudon Snowden  
Superintendent

Sir

In answer to the request of the Melter & Refiner to you. To have the water in the Sweeps room changed from pumping into the Culvert. To the setting well in the yard, It would necessitate an additional Pump as our pumps are overtaxed at the present time to do the work of the General Department. I would recommend to you the procuring of an Ericsson's Coloric pump for the same. All of which I submit for your consideration.

I remain Respect. Yours  
John L. McGinnis  
Chief Engineer
